# Welcome to New Mexico Gas Company's Home Energy Report

In the coming months you will receive personalized reports to help you track your natural gas usage.

## THIS REPORT IS DESIGNED TO HELP YOU SAVE MONEY AND ENERGY.

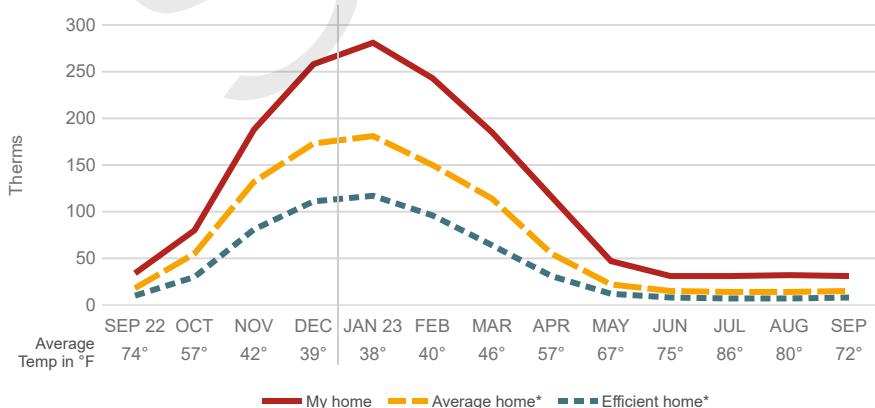

In your reports, you will find:

**Your household comparison**, shows your current energy use compared to nearby, occupied single-family homes with similar characteristics.

**Your energy use patterns** as they change throughout the year. This will help you find the best opportunities for energy savings.

**Personalized energy efficiency tips** chosen specifically for you based on how you use energy and the characteristics of your home.

## YOUR HOME COMPARISON OVER TIME

\*Your usage is compared with that of at least 50 New Mexico Gas homeowners who live in homes with similar size (3,000 – 4,000 Sq. Ft.) and age (1960 – 1979). Efficient homes are the 20% who use the least amount of natural gas.

You used **62% more** natural gas than average homes.

**Call (llame al):** 1-877-501-7835

**Scan the QR Code** on the front page (escanee el código QR en la página principal)

## START SAVING MORE ENERGY TODAY

### Big impact

**Say goodbye to high bills and cold nights: Get an efficient heating system.**

The harder your heating system has to work, the higher it drives your bill. If your heating system is struggling to keep up, it's time to switch to a new, more efficient system. You'll stay comfy, use less energy and enjoy a quieter operation.

**Improve energy efficiency up to 50%.**

### Quick fix

**Help your heating system work smarter, not harder.**

Blocked vents and radiators can make your system work up to 25% harder. Take a few minutes to see if vents or radiators are blocked by furniture, rugs or other items. Letting the air flow freely will help your rooms warm up more quickly and efficiently.

**Improve system performance up to 25%.**

### Big impact

**This improvement has so many benefits, it's a no-brainer.**

Insulation is your home's primary defense against heat loss in winter and loss of cool air during summer months. Add insulation to a level of R38 in your attic to keep your home comfortable all year round. Insulation also improves your home's indoor air quality, reduces noise, and increases your home's resale value. It's win-win-win.

**Save up to \$145 on heating and cooling costs per year.**

### Find More Ways to Save

New Mexico Gas Company offers rebates for energy efficiency upgrades to your home. Visit [nmgcgetrebates.com](http://nmgcgetrebates.com) to learn more.
